

---

This introduction hasn't been written by the user. If you're looking for a couple of hours of fun and entertainment, here is a list of recommendations on some Hindi-language movies that are worth watching. The movies depicted in this article were chosen because they had more than three thousand YouTube views as of August 2017 which automatically puts them up there as the most popular ones. It was not an easy task to pick out 50 good movies from such vast amounts of material, but we chose those that we thought would be entertaining and will leave their mark on you even after you forget about them after one viewing. The list of movies presented in this article is not ordered in any type of rank, and they all have their own specific style and theme. These categories represent the most popular ones. If you want to watch a movie that fits into a certain category or genre then this article will guide you through it and help you make an informed decision. Note: Please feel free to add any movies that we may have missed in the comments section below. A good movie often goes unnoticed by most viewers and slips through the cracks, so we would appreciate it if you could share your favourite Hindi-language movies with our readers!
